Novas Toilet Partition Fittings

The fittings specifically designed to cater for all segments of the market. The toilet partition collections have earned a worldwide reputation for reliable high quality products, which have been installed throughout the UK, Middle East, Asia, New Zealand and Australia.

The design process backed by our team of engineers incorporates the key elements that drive the toilet partition market; aesthetics, durability, finish, cost competitiveness and ease of installation.

Materials

Toilet Partition Fittings are manufactured from 304 grade Stainless Steel and Zinc Die Cast. Polished stainless steel and chrome plate are available upon request.

NOVAS

Hinge Handing

The hand of the hinge must be related to the direction the door opening and the side of the door on which the hinge knuckle is visible. Thus, a left hand door (open in) requires a left hand hinge. However, a left hand hinge is also required for a right hand reverse door (open out). Consequently the opposite applies for a right hand hinge (refer hinge handing above).

Always hand the hinge from the knuckle side of the door. eg. Hinges positioned to the left of the door, are left hand. Hinges positioned to the right of the door, are right hand.

Guarantee

Novas Architectural guarantee all their products against defects in workmanship and materials subject to inspection and confirmation of fair wear and tear within the normal working life of the product.

Novas Architectural assumes no liability for:

1. Improper installation or failure to follow fitting instructions.
2. Product failure due to improper maintenance or unfair wear and tear.
3. Indirect or consequential loss or damage.
4. Cost of removal and/or replacement.
5. Cost of freight and/or travelling expenses.
6. Some plated finishes are classified as soft finishes. Deterioration is possible under some climatic conditions and cannot be unconditionally guaranteed.

Consult your local Novas Architectural Representative or Agent for advice on all finishes.
